

C/R**Rawhide****MALLETS**

are available in two types.

Standard mallets are lightweight, ideal for gentle tapping or sharp, light blows. Loaded mallets, identified with blue band around handle, are weighted with heavy strip lead for extra striking power.

Rawhide
HAMMER

• aligning work in process . . .

• for assembling . . .

• dismantling . . .

In thousands of plants, throughout hundreds of types of industry, C/R hammers and mallets prove their ability to "take it" under severe and continuous use. They speed work, reduce fatigue, increase safety. Tough, resilient waterbuffalo hide faces eliminate breaking and spoiling finished work . . . save you many times their low original cost.

NOTE: Safety-Flare grip handle. Will not slip out of your hand.

After work has been tightened, they are perfectly balanced . . . increases the workers' speed and confidence.

C/R Rawhide FACES

Faces for C/R Jaw-Head hammers are made from tightly rolled waterbuffalo hide, chosen for its superior strength and resilience. They will not chip or shatter, or rebound dangerously from a heavy blow. Thus all danger from flying fragments which might injure the eyes or fall into work is eliminated. Waterbuffalo hide will never spark against a metal surface . . . can be used with absolute safety in chemical or other plants where fire hazard is high.

SAFETY..STRIKING POWER..DURABILITY

C/R'S new Jaw-Head hammer is a real time-saver! It strikes hard, controlled blows. Made of tough, resilient waterbuffalo hide, C/R faces are superior in safety and durability. They will not break or mar finished surfaces, machine parts or tools . . . will not smear, discolor or otherwise mark products. Any worker can replace the rawhide faces in just a few minutes. Merely loosening a nut releases jaws for replacing face. When nut is tightened, they are held in a vise-like grip. The Jaw-Head hammer is perfectly balanced . . . increases the workers' speed and confidence.
